

View Site Operations Center (SOC)

Life made simpler with View SOC

View has a team dedicated to ensure each View Dynamic Glass system is fully operational and running optimally at all times. The team manages View's Site Operations Center (SOC) where they can service each customer installation in real time.

SOC Services

- Custom Intelligence® tuning to optimize glass performance
- Reporting of system operation and Intelligence® performance
- Real-time remote programming, monitoring, and troubleshooting
- Archiving of historical data and trends

SOC Benefits

- Maximize performance and benefits from View Dynamic Glass
- Minimize time and resources spent by facilities and property managers
- Fast customer service response time and troubleshooting
- Ensure business operations is not disrupted and employee productivity is maintained
- Obtain historical data that can be used for trending energy use, tinting behavior, occupant comfort, etc.
