Complimentary Design Analysis

Comprehensive analysis showing you the difference our smart windows can make to your building

Glare Analysis
We calculate the number of direct glare hours your building will experience during the year based on location.

Thermal Comfort Stimulation
We evaluate occupant comfort by stimulating skin level temperatures from direct sun exposure through glazing.

Budget and Cost Analysis
We estimate total price, deductions and annual savings to help you determine the overall project finances.

Energy Modeling
We performance energy building stimulations to determine peak HVAC sizing and annual energy savings.

Daylight Analysis
We compare the amount of daylight the baseline and dynamic glass options will bring into your space.

Custom Renderings
We modify your renderings to show what the building will look like in reality with blinds and with dynamic glass.

Life Cycle Costing Analysis
We perform and 25 year LCC analysis using a real discount rate and standard equipment replacement cycles to calculate the net present value of your investment.

LEED
We show you how you can contribute more points to your LEED certification by using dynamic glass.
