FOR MEDICAL OFFICES

A More Healing Healthcare Environment

 KAISER PERMANENTE

Kaiser Permanente - Skyport
San Jose, CA

WELCOME

MEDICAL OFFICES

Enable patients to heal faster and increase staff satisfaction

Medical offices today are focusing on the quality of the healthcare environment to contribute to better health outcomes. View Smart Windows are the technology that maximizes the amount of daylight and offers unobstructed views to the outside while blocking heat and glare. With a more light-filled environment, View allows your patients to feel better and your staff to be more productive.

Studies have shown that exposure to natural light improves mood, reduces depression and improves over-all comfort. It also leads to higher job satisfaction, and improves diagnostic ability for physicians and nurses. A study done in collaboration with Alta View Hospital showed that View Smart Windows resulted in a 53% increase in occupant access to daylight and views and a 73% decrease in heat and glare complaints when compared to traditional windows.

View also can provide upfront cost savings through the removal of shades, down-sizing HVAC, and reducing energy costs. With View, you can create a delightful healthcare experience and save energy, while driving positive business outcomes - a triple play!

“Natural light plays a huge role. View Smart Windows helps us create an environment that is warm, friendly and where our staff can be productive in.”

David Baytos

CEO, Methodist Olive Branch Hospital

sustainability

Daylight contributes to:

¹ From surveys conducted with 800 occupants

View Smart Windows are a complete system

Your Benefits

Increase staff productivity and reduce attrition

Improve patient recovery and healing time

Increase patient survey satisfaction scores

Reduce hospital acquired infection rates

Save energy and advance environmental sustainability

Patient & Staff Benefits

Optimize daylight, control glare

Maximize views and connection to outside

Enhance thermal comfort

Improve staff mood and productivity

Increase patient engagement

Dynamic Control of Glare and Comfort

View Smart Windows tint automatically based on outdoor and indoor conditions to offer you optimal comfort at all times.

Tint 1

is clear and lets in the most sunlight and warmth. It is the default level.

Tint 2

manages some solar heat, while still remaining clear.

Tint 3

diverts glare and heat while still allowing for daylight.

Tint 4

controls glare and keeps you cool.
